Devoted to Closing the Global Education Divide

Get Involved!

There are many ways you can get involved:

- by being a part of travelling workshops equipping teachers in other countries with resources and best practices,
- by helping to develop and/or donating educational resources,
- by collaborating with and mentoring teachers across the globe, or
- by connecting your class with a class in another country for collaborative learning projects and friendship.

The true way that we can develop global citizens is if we actually taught, learned and acted within a global context.
